ALFIE

AI helps you with blog posts

LEARN MORE

Kaan Bursa

The Problem

- Costly
- Time Consuming
- Error Prone

The Solution

A bot that has gained expertise on reading 120.000 news article.

Pattern Recognition

The model recognizes the content and recommends related sentences.

Selecting the Right Words

Alfie can auto complete the sentence you are writing.

Automation

When the news are recuring let Alfie write the news for you.

Bespoke

Alfie's architecture can be fine-tuned for specific tasks.

Customer Base

- Newspapers
- Bloggers
- Startups
- Journals

The Model

State-of-the-art transformer model GPT-2.

Next Word Prediction

Alfie is trained to predict the next word given by looking at the context.

Transfering Knowledge

Alfie knows the structure of the language and you can make the model learn what you want it to learn.

Attention

Alfie's architecture is trained to pay attention to keywords from the past so no information loss.

Zero-Shot Learner

The model architecture performs good in other language tasks without any training.
